

Summer Learning 2019 Entering Grade 4

Summer Learning activities provide students with opportunities to practice the skills they acquired this year so that they enter the new school year ready to learn. This summer, students entering Grade 4 will be expected to complete required summer reading, writing, and math activities. Students may also complete optional technology activities. Details and additional information are attached.

Reading:

Students will read *The Lemonade War* by Jacqueline Davies. In addition, each student will read from sources of their choosing in order to reach their individual reading goal.

Writing:

Students will complete at least 4 journal entries. Each entry will be written in cursive, have a minimum of 20 sentences, begin with an introduction, and end with a conclusion sentence. Students will write in their classroom journal and may glue in anything that will add value to their writing.

Math:

Each student will receive a summer learning math packet composed of extra math practice sheets from their math workbook. These pages contain problems based on concepts learned this year.

Please complete all reading, writing, and math activities and turn them in to your new teacher by August 15.

My Reading Goal

I _____ will read the following number of pages this summer: _____
(student name)

Student signature: _____ Teacher signature: _____

I understand that I must meet or exceed my reading goal and complete my math and journal activities by August 15 in order to participate in the *Summer Learning Celebration Activity* on August 16.

Parent signature: _____

Parents, please sign and return this form to your child's teacher by May 9. This contract will be returned to you and your student in your student's Summer Learning folder on May 16.
